Pregnancy Cushion

The Pregnancy Cushion set comprises two torso sections, shaped to accommodate the breasts and stomach. Side wedges allow the cushions to be raised as the pregnancy progresses. The adjustable face crest ensures perfect positioning for head and neck, whilst the knee bolster takes pressure off the lumbar region. Set includes carry bag.

Ankle & Knee Bolsters

These massage table bolsters are great support cushions for manipulative and massage therapy. Use as a positioning aide for improved access or simply improve client comfort by positioning under the knees or ankles to align the vertebrae and relieve stress on the lower back.

Supine Headrests

Supine headrests replace the face crest cushion when your client is in the supine position. The square one acts as a normal head cushion, whilst the rounded one provides good therapist access to the neck.

Neck & Back Support

The contoured neck cushion cradles the neck and keeps the upper vertebrae aligned during treatment. The nape bolster also carries out this function and its small size means it is also useful to support the arms. The triangle bolster has a 30° incline for use on massage tables as a support for the back.
